

Dataset

> Scrapy → webRobots.io

> Select the data:

>> Fields

>> +4300 samples

>> Values

> Clean the data

```
1 {  
2   "name": "DreemBee - Sweet Dreams",  
3   "blurb": "An extremely user-friendly child's video player...",  
4   "category": "Gadgets",  
5   "goal": 40000.0,  
6   "pledged": 36479.0,  
7   "backers": 101,  
8   "launched_at": 1414517474,  
9   "deadline": 1419705074,  
10  "success": 0  
11 }
```

Experimental Setup

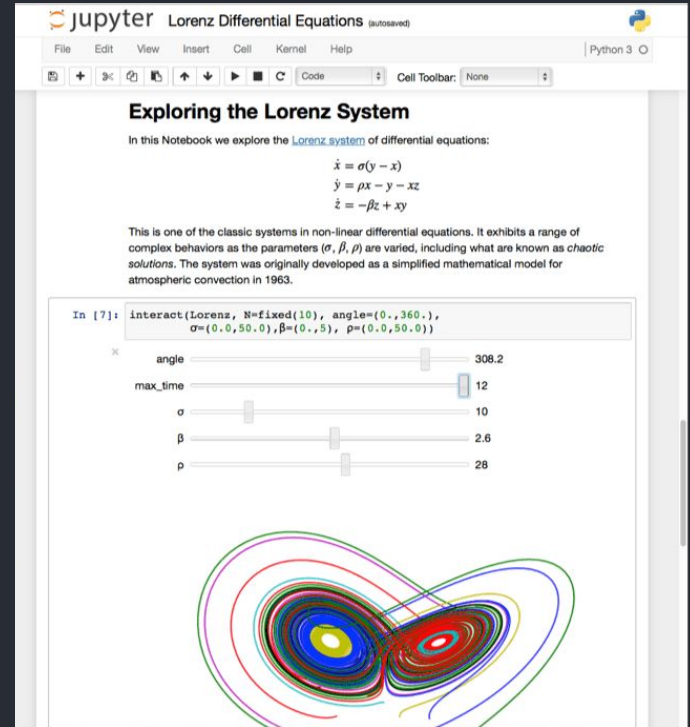

> Jupyter Notebook:

>> Clean the data

>> Visualize its shape

>> Simple examples of what we
try to achieve

>> More complex examples with
more valuable information

Preliminary Results

> Jupyter Notebook:

```
>> Clean the data
```

```
>> Visualize its shape
```

```
>> Simple examples of what we try  
to achieve
```

```
>> More complex examples with more  
valuable information
```
